EMRISE CORPORATION ANNOUNCES MARKETING AND PRODUCT DEVELOPMENT AGREEMENT WITH BRILLIANT TELECOMMUNICATIONS

RANCHO CUCAMONGA, CALIFORNIA, April 1, 2008 - EMRISE CORPORATION (NYSE Arca: ERI), a designer, manufacturer and marketer of proprietary electronic devices and communications equipment for aerospace, defense, industrial, and communications applications, today announced at the CTIA Wireless convention in Las Vegas that, through its subsidiary, CXR Larus Corporation, it has entered into a bilateral agreement with an industry leading innovative Silicon Valley company Brilliant Telecommunications for the sale and marketing of products, and access to Brilliant's market leading technology.

Carmine T. Oliva, President and CEO of EMRISE, commented, "This agreement provides EMRISE access to market leading standard products from Brilliant allowing CXR Larus to broaden its product offering in the Next Generation Network Market. Additionally, Brilliant will be providing technology for integration into our next generation of products enabling us to shorten the time to market and provide a full range of timing products. Of equal importance, we embrace the opportunity to jointly market our respective products. Utilizing our strong direct and distribution sales channels in the telecommunications, utility, and enterprise markets in parallel with the extensive market presence and brand that the Brilliant products have already established, we believe, will provide additional opportunities for our products and the opportunity to work with an established technological leader."

Charles Barry, Chairman and CEO of Brilliant, commented, "For Brilliant, this broadens our distribution and support channels to drive rapid market expansion of our precise timing and synchronization technologies for next generation networks. It also allows us to broaden our product portfolio with complimentary products, providing a more complete end-to-end solution and faster time to market. We welcome this partnership to address a mutually profitable marketplace."

About Brilliant Communications

Founded in 2004, Brilliant Telecommunications designs, develops, and distributes a family of network timing, management and synchronization solutions, including carrier-class NTP servers, Primary Reference Sources (PRS), and Building Integrated Timing Supplies (BITS). These highly accurate end-to-end timing network solutions deliver Service Level Agreement (SLA) monitoring and management capabilities, in addition to providing timing and synchronization to the most time-sensitive applications in legacy and next-generation IP networks.
